List of Contents

NUMBER 1

Hans Kellerer and **Gerhard J. Woeginger**	1	UET-scheduling with constrained processor allocations
Jae-Dong Hong and **Jack C. Hayya**	9	An (s, Q) policy with setup reduction in a single-stage batch manufacturing system
Heeseok Lee and **Olivia R. Liu Sheng**	21	A multiple criteria model for the allocation of data files in a distributed information system
J. Medhi and **J. G. C. Templeton**	35	A Poisson input queue under N-policy and with a general start up time
Dennis M. Buede	43	Superior design features of decision analytic software
Lynn Kiaer and **Jay Yellen**	59	Weighted graphs and university course timetabling
Robert L. Carraway, Robert J. Chambers, Thomas L. Morin and **Herbert Moskowitz**	69	Single machine sequencing with nonlinear multi-criteria cost functions: an application of generalized dynamic programming
Carl M. Harris and **Edward Rattner**	79	Estimating prevalence and incidence of HIV/AIDS in the U.S. using spreadsheet methods
Announcements	I	

NUMBER 2

Christian N. Madu and **Chu-hua Kuei**	95	Group screening and Taguchi design in the optimization of multi-echelon maintenance float simulation metamodels
Gin-Shuh Liang and **Mao-Jiun J. Wang**	107	Personnel placement in a fuzzy environment
Seong-in Kim, Hanif D. Sherali and **Heung-Sun Park**	123	Minisum and minimax paths of a moving facility on a network
Ching-Jong Liao and **Matthew Rosenshine**	133	A heuristic for determining the optimal order in a tandem queue
Christian Lardinois, Teodor Gabriel Crainic and **Johanne Dion**	139	An interactive graphic approach for the integrated design of intercity transportation timetables and vehicle operations
Jun Wang and **B. Malakooti**	151	A feedforward neural network for multiple criteria decision making

Srinivas Y. Prasad and **Mark H. Karwan** 169 A note on solving bicriteria linear programming problems using single criteria software

Announcements I

NUMBER 3/4

NEURAL NETWORKS AND OPERATIONS RESEARCH

Samuel J. Raff 175 Preface

James P. Ignizio and **Laura I. Burke** 177 Foreword

Laura I. Burke and **James P. Ignizio** 179 Neural networks and operations research: an overview

Chee-Kit Looi 191 Neural network methods in combinatorial optimization

M. D. Johnston and **H.-M. Adorf** 209 Scheduling with neural networks—the case of the Hubble space telescope

Shivakumar Vaithyanathan and **James P. Ignizio** 241 A stochastic neural network for resource constrained scheduling

Laura I. Burke and **Poulomi Damany** 255 The guilty net for the traveling salesman problem

Jean-Yves Potvin, **Yu Shen** and **Jean-Marc Rousseau** 267 Neural networks for automated vehicle dispatching

Lenore DeSilets, **Bruce Golden**, **Qiwen Wang** and **Ram Kumar** 277 Predicting salinity in the Chesapeake Bay using backpropagation

Jaishankar Chakrapani and **Jandranka Skorin-Kapov** 287 A connectionist approach to the quadratic assignment problem

Jun Wang and **Vira Chankong** 297 Recurrent neural networks for linear programming: analysis and design principles

NUMBER 5

Santi B. Lahiri 313 Skill-sets migration planning via analytic hierarchy process

Bay Arinze and **Fariborz Y. Partovi** 321 A knowledge-based decision support system for project management

Olivia R. Liu Sheng 335 Optimization of file migration policies in distributed computer systems

Nagraj Balakrishnan, Abilio Lucena and **Richard T. Wong** 353 Scheduling examinations to reduce second-order conflicts

Panos M. Pardalos and **Gregory P. Rodgers** 363 A branch and bound algorithm for the maximum clique problem

R. G. Thompson, E. Lee and **R. M. Thrall** 377 DEA/AR-efficiency of U.S. independent oil/gas producers over time

H. Hsieh, K. F. Lam and **E. U. Choo** 393 Comparative study of dynamic lot sizing heuristics with backlogging

Michael C. Fu, Jian-Qiang Hu and **Rakesh Nagi** 409 Bias properties of infinitesimal perturbation analysis for systems with parallel servers

Richard M. Feldman, William M. Lively, Tom Slade, L. G. McKee and **Alan Talbert** 425 The development of an integrated mathematical and knowlege-based maintenance delivery system

Han-Lin Li 435 An approximate method for local optima for nonlinear mixed integer programming problems

David Ronen 445 Allocation of trips to trucks operating from a single terminal

Ching-Jong Liao, Rong-Hwa Huang and **Sheng-Tsaing Tseng** 453 Use of variable range in solving multiple criteria scheduling problems

Announcements I

NUMBER 6

Youling Lin, Larry M. Austin and **James R. Burns** 461 An intelligent algorithm for mixed-integer programming models

T. William Chien 469 Operational estimators for the length of a traveling salesman tour

Donald E. Brown, Clarence L. Pittard and **Andrew R. Spillane** 479 Asset: a simulation test bed for data association algorithms

B. Golany, R. Maman and **M. Yadin** 495 An efficient algorithm for the dynamic economic lot size problem

Krishan Rana 505 A decomposition technique for mixed integer programming problems

W. C. Benton and **Manuel D. Rossetti** 521 The vehicle scheduling problem with intermittent customer demands

A. M. Krieger and **M. Raghavachari** 533 V-shape property for optimal schedules with monotone penalty functions

Susan H. Xu, Srikanta P. R. Kumar and **Pitu B. Mirchandani** 535 Scheduling stochastic jobs with increasing hazard rate on identical parallel machines

Announcements I

NUMBER 7

IMPLEMENTING MULTIOBJECTIVE OPTIMIZATION METHODS: BEHAVIORAL AND COMPUTATIONAL ISSUES

Samuel J. Raff 545 Preface

Jeffrey L. Ringuest 547 Introduction

Invited Essays

Pekka Korhonen 549 Multiple criteria decision support: the state of research and future directions

Ralph E. Steuer 553 On the academic exchange of research software: an opportunity for MCDM leadership

Po-Lung Yu 559 To be a great operations researcher from a MCDM scholar

Milan Zeleny 563 An essay into a philosophy of MCDM: a way of thinking or another algorithm?

Stanley Zionts 567 Some thoughts on research in multiple criteria decision making

Contributed Papers

Antonie Stam and **Lorraine R. Gardiner** 571 A multiple objective marketing-manufacturing approach for order (market) selection

Yong Shi and **Po-Lung Yu** 585 Selecting optimal linear production systems in multiple criteria environments

C. Henggeler Antunes, Maria J. Alves, Ana L. Silva and **João N. Climaco** 609 An integrated MOLP method base package—a guided tour of TOMMIX

Wai-Yin Ng 627 A decision support system for multi-objective design of practical controllers

Włodzimierz Ogryczak, Krzysztof Studziński and **Krystian Zorychta** 637 DINAS: a computer-assisted analysis system for multiobjective transshipment problems with facility location

P. Simin Pulat, Fenghueih Huarng and **Haijune Lee** 649 Efficient solutions for the bicriteria network flow problem

K. Roscoe Davis, Antonie Stam and Ronald A. Grzybowski 657 Resource constrained project scheduling with multiple objectives: a decision support approach

Vahid Lotfi, Theodor J. Stewart and Stanley Zionts 671 An aspiration-level interactive model for multiple criteria decision making

Samuel B. Graves, Jeffrey L. Ringuest and Jonathan F. Bard 683 Recent developments in screening methods for nondominated solutions in multiobjective optimization

Lori S. Franz, Gary R. Reeves and Juan J. Gonzalez 695 Group decision processes: MOLP procedures facilitating group and individual decision orientations

Ronald Klimberg 707 GRADS: a new graphical display system for visualizing multiple criteria solutions

Announcements I

NUMBER 8

M. O. Abou-El-Ata and A. M. A. Hariri 713 The $M/M/c/N$ queue with balking and reneging

Christos P. Koulamas 717 A stochastic model for a machining cell with tool failure and tool replacement considerations

Ajay K. Rathi, Richard L. Church and Rajendra S. Solanki 731 A macro level analysis of the airlift deployment problem

Sheldon Epstein, Yonah Wilamowsky and Bernard Dickman 743 Deterministic multiprocessor scheduling with multiple objectives

Vasanthakumar N. Bhat 751 Switched Poisson process/G/1 queue with service interruptions

Chang S. Sung and U. G. Joo 757 A single machine scheduling problem with earliness/tardiness and starting time penalties under a common due date

Chang S. Sung and Myoung H. Park 767 Performance analysis of a queuing system with facilities requiring post-processing

Kwang Shin and Steve Corder 783 Implementing the Ford–Fulkerson labeling algorithm with fixed-order scanning

G. Paletta 789 A multiperiod traveling salesman problem: heuristic algorithms

Note

Daniel Geist and **Ervin Y. Rodin** 797 Adjacency of the 0–1 knapsack problem

Announcements I
